you purchase a barrier or decorative
accessory that includes a barrier.

“ Empire Comfort Systems Inc. has manufactured safe, reliable heating systems since 1932. We take pride in our reputation for quality products, backed by the best sales, service, and distribution network in this industry. The White Mountain Hearth Series combines our proven technologies with exceptional artistry and craftsmanship to add beauty and warmth to any home. ”

Mantis Fireplace (28,000 Btu) installed in-wall with Louverless Surround with Barrier Screen

Welcome to Mantis

Heating with a Mantis can reduce your annual heating costs by 35 percent – compared to a conventional direct-vent heater or fireplace. Heating with a natural gas Mantis in place of a pellet stove can save up to 50 percent on fuel every year or up to 42 percent compared to heating with a wood-burning stove.

And because the Mantis operates on convenient, clean Natural Gas or LP, you eliminate the mess and manual labor inherent in heating with solid fuels, such as pellets and wood.

Fireplace Mantis Package (28,000 Btu) with Insert Surround Kit with Barrier Screen

Mantis Bay Window Pedestal Package (28,000 Btu) with Barrier Screen

How Efficient is Efficient?

The super-efficient Mantis exceeds 90 percent efficiency – making it the most efficient vented fireplace you can buy.

Mantis G-Class (20,000 Btu) installed in-wall with Louverless Surround with Barrier Screen

Versatile Installation

With the power-vented exhaust and intake made from PVC, the venting options are numerous. Install the Mantis as a direct-vent co-axial system, as a direct-vent co-linear, or as a single-vent system. Using PVC for venting significantly reduces installation time and cost and requires cutting a much smaller opening in the home's exterior than is required for conventional metal venting. This makes Mantis ideal for any installation, especially for sunrooms, basements, and other applications that demand unobtrusive venting.

Any vent configuration may be used with any Mantis package. Packages include PVC vent adaptors for single and co-linear venting. Lengths of 1 1/2-inch PVC to complete the vent run are available at your local hardware store.

Chateau Clean-Face Direct-Vent Luxury Fireplaces

Installing a Chateau Clean Face Direct-Vent Fireplace in your home makes a bold statement. Sized to complement the scale of today's open floor plans and great rooms and equipped with advanced dual burners and accent lighting, your Chateau Fireplace will set the desired mood in your living space.

Whether you opt for a 36-inch model with 1,150 square inches of viewing glass or the 42-inch with its panoramic 1,600 square inches – your new fireplace will provide the appearance of a massive site-built installation with the convenience of a modern direct-vent system.

Every Chateau fireplace includes a programmable remote control to independently operate the dual burners and the built-in dimmer lighting. This simple, intuitive thermostat remote features day-of-week programming so you can set it to cycle off at bed time and cycle on in the morning, so you wake to a warm fire. Chateaus also include a barrier screen.

The Chateau's Green Earth Preferred Multi-Function Control system eliminates the standing pilot – saving energy and money.

In the event of a power outage, the built-in battery-backup system allows your Chateau fireplace to continue to operate – providing life-saving warmth for your home until power is restored.

Chateau Fireplaces are offered in Traditional (with log set, brick liner, and overhead lighting) and in Contemporary (with rear main burners and front accent burner for decorative glass, porcelain liner, and lighting mounted beneath the accent burner).

Both systems are available in LP and Natural Gas.

Chateau 36 Traditional Direct-Vent Fireplace with Barrier Screen

Chateau 42 Contemporary Direct-Vent Fireplace with Aqua Blue Glass Droplets and Barrier Screen

Front Accent burner operates as on/off. Decorative glass and dimmer-controlled lighting beneath the Accent Burner let you create the look to suit your décor and mood. Decorative glass drops and droplets are available for the Chateau Contemporary and the Boulevard Contemporary in a variety of colors (see below).

Topaz Clear Drops

Clear Frost Crushed

Black Polished Crushed

Accent Pebbles

Boulevard Linear Direct-Vent Fireplaces

The 34,500 Nat / 31,500 LP heater-rated Boulevard Fireplace features a large ceramic glass window (more than 700 sq. in.) that provides excellent heat transfer and contributes to its exceptional efficiency.

Every Boulevard fireplace includes an intuitive Multi-Function remote control with day-of-week thermostat programming so you can set it to cycle off at bedtime and cycle on in the morning, so you wake to a warm fire.

The Boulevard's Green Earth Preferred Intermittent Pilot system eliminates the standing pilot – saving energy and your money. When you want fire, press the button – or just let the programmable thermostat maintain your desired room temperature. Thanks to its advanced logic, the thermostat remote control anticipates heat demand to minimize temperature fluctuations in the room.

In the event of a power outage, your Boulevard fireplace can operate with a standing pilot – to provide life-saving warmth for your home until power is restored.

Complete your fireplace installation with a required decorative front – available in 2-inch and 4-inch. Boulevard Fireplaces are offered in ultra Contemporary and Traditional with a modern twist. All fronts include barrier screens.

The Contemporary features a linear burner, lighting mounted beneath the burner, and a black porcelain liner. The rich liner reflects the flames and the lighting. Optional decorative ceramic glass panels add visual interest to the fireplace interior and complement the flames. Use the remote control to raise or lower the lighting levels and the panels glow red along their edges. The remote control also operates the optional blower.

The Boulevard Traditional includes your choice of one of two new hand-painted log sets – Charred or Driftwood. For faster heat distribution, order the optional circulating blower. Matte black walls accentuate the simplicity and clean lines. The black porcelain liner is available as an accessory.

Both fireplace styles are available in LP and Natural Gas.

Forest Hills Portrait-Style Direct-Vent Fireplaces

Forest Hills Portrait-Style Contemporary Direct-Vent Fireplace with White Piazza Vessel and Beveled Window Frame in Brushed Nickel

Forest Hills Portrait-Style Traditional and Contemporary Fireplaces

With its clean vertical lines the Forest Hills Portrait Fireplace adds a striking design element to your home décor. Available in Contemporary and Traditional models, these unique fireplaces offer several designer options to let you create your perfect fireplace. The clean-face design allows tile or stonework to the edge of the window frame.

In the contemporary models, the vertical motif carries through to the interior where multiple folds in the porcelain liner add to the impression of height. The rich black porcelain reflects the fire to create depth and enhance visual interest from any position in the room. The dual burner system resides in an earthenware vessel – in your choice of black or white – filled with your choice of crushed glass. Accent lighting concealed beneath the floor creates a warm glow.

For a more conventional fireplace, choose the traditional model with its realistic hand-painted log set and ceiling-mounted accent lighting. Add the Rustic Banded Brick or Old World Stone liner – or the Black Porcelain liner which reflects the flame to create even greater visual interest. The available andirons add to an old-world look. The optional blower aids in heat circulation.

All Forest Hills fireplaces include a multifunction thermostat remote control that can vary the flame height of the main burner. The remote lets you vary the accent lighting system, the optional blower, and even operate an unrelated appliance – such as a lamp or holiday decorations plugged into an outlet beneath the fireplace.

Forest Hills Portrait-Style Direct-Vent Fireplaces

Add a decorative front or frame to your new direct-vent fireplace. Choose from four styles in a variety of finishes including hand-forged black copper, natural iron, and brushed nickel. Your front or frame attaches in seconds. Each front or frame comes with a fireplace screen to prevent contact with the hot glass. A simple black barrier screen is also available.

Forest Hills Portrait-Style Traditional Direct-Vent Fireplace with Old World Stone Liner and Cathedral Front in Black Copper

Contemporary Direct-Vent Fireplaces and Inserts

Our Loft Series fireplaces deliver warmth – along with a clean pallet to let you exhibit your flair for contemporary design.

Available as a fireplace for in-wall or mantel installation, as an insert for installation in an existing fireplace, and as a see-through fireplace, the direct-vent Loft family delivers state-of-the-art technology for extraordinary performance.

Our intermittent pilot (IP) systems put the green in contemporary living. They help save energy by eliminating the standing pilot light. IP technology is available on our small and medium Loft fireplaces and on all Loft inserts and is standard on Luxury Clean-Face Loft Fireplaces. IP systems include an on/off switch – add a remote control to light your fireplace from anywhere in the room.

Millivolt systems operate without electricity to provide heat even in a power outage. Take charge of your Millivolt fireplace with an optional on-off remote control. Millivolt technology is available on our Loft fireplaces and inserts.

Fireplace barrier screens protect you and your family from inadvertently touching the hot glass. Choose a simple black screen or decorative front with barrier screen.

Loft Medium Direct-Vent Fireplace (DVL33FP) with Eclipse Front in Stainless Steel with Barrier Screen

Loft Series Small and Medium Direct-Vent Fireplaces

Designed for in-wall installation, your direct-vent Loft fireplace delivers state-of-the-art technology for extraordinary performance.

Black porcelain lines the fireplace interior, including the burner top, creating a subtle reflective surface that enhances the appearance of depth. Flickering yellow flames dance atop the linear burner, echoing their light off the glass and the porcelain liner to create a nearly infinite flame effect – making your Loft fireplace mesmerizing from any angle.

The required metal surround is available in 4 styles and a variety of finishes.

Put a twinkle in your Loft fireplace by covering the burner top with the optional decorative glass. Choose from crushed glass, 1/2-inch droplets, and 1-inch drops.

Available in Millivolt and Intermittent Pilot.

These fireplaces require a barrier screen or decorative surround/front with barrier screen.

Loft Fireplace Inserts

Installing a Loft Fireplace Insert turns your messy and inefficient wood-burning fireplace into a clean-burning, efficient heat source – an investment that will quickly pay for itself in saved energy and reduced hassle.

Available in Millivolt and in energy-saving on/off Intermittent Pilot control systems, your insert starts saving energy and improving your décor from the moment you first turn it on.

Choose one of three styles of decorative surrounds in a variety of finishes. Complete your insert installation with a venting kit – available in 17-feet and 25-feet – with termination cap.

Loft 36-inch See-Through Fireplace with Stainless Steel and Matte Black Surround

Loft See-Through Direct-Vent Fireplace

At just 18 inches deep, this Loft Fireplace provides the see-through contemporary look without cutting into your floor space.

The Loft See-Through Fireplace includes a variable speed blower and light kit. The Multi-Function Remote Control, which is also included, allows you to vary the flame height and blower speed and operate the light – all from the comfort of your recliner.

The standard black porcelain liner adds to the feeling of depth. Two optional surrounds – matte black and stainless steel with matte black – suit this ultra-contemporary looking system.

Tahoe Luxury Direct-Vent Fireplaces

Tahoe 36 Luxury Direct-Vent Fireplace with Banded Brick Liner, Arched Louvers and Outer Frame in Matte Black in a Custom Mantel and Base

Luxury Series

- **35,000 Btu Nat, 36-inch, 13-piece Log Set (Top-Vent Only)**
- **30,000 Btu LP, 36-inch, 13-piece Log Set (Top-Vent Only)**
- **37,500 Btu Nat, 42-inch, 13-piece Log Set (Top-Vent Only)**
- **35,000 Btu LP, 42-inch, 13-piece Log Set (Top-Vent Only)**

Tahoe Luxury models retain the same overall dimensions as Premium models but feature ceramic glass (for better heat transfer), dimmer-controlled accent lamp inside the fireplace, a unique banded brick liner (that combines traditional straight courses with a band of angled bricks), automatic blower, and an intricately detailed 13-piece log set atop the Slope Glaze Excess Burner for a fuller ember bed. And with its larger flame, the Luxury fireplace produces more heat.

Luxury models are offered in Millivolt (with standing pilot), Direct Ignition, Intermittent Pilot, and Multi-Function Remote models. Multi-Function Remote models include a thermostat remote control that automatically varies flame height and blower speed to maintain your pre-set temperature.

See pages 27-29 for liners, control options, decorative accessories, and required barrier screens.

Tahoe Luxury 42 Direct-Vent Fireplace with Banded Brick Liner

Tahoe 36 Premium Fireplace with Aged Brick Liner, Stainless Steel Arch Louvers and Black Outer Trim with a White Standard Corner Mantel

Premium Series

- **25,000 Btu Nat, 36-inch, 4-piece Log Set**
- **27,000 Btu LP, 36-inch (Top-Vent Only), 4-piece Log Set**
- **28,000 Btu, 42-inch, 4-piece Log Set**
- **30,000 Btu, 48-inch, 4-piece Log Set**

Every Premium Tahoe model includes a tempered glass view window and a four-piece log set, mounted atop our legendary Slope Glaze Burner for a rich flame pattern within a taller, deeper log stack that complements the deeper fireplace (20 inches).

Premium Tahoes are offered in Millivolt models (with standing pilot), in Intermittent Pilot models, and in Multi-Function Remote models. Multi-Function Remote models include a thermostat remote control that automatically varies flame height and blower speed to maintain your pre-set temperature.

See pages 27-29 for liners, control options, decorative accessories, and required barrier screens.

Tahoe Premium 42 Direct-Vent Fireplace

Tahoe Deluxe Direct-Vent Fireplaces & Multi-Sided Fireplaces

Tahoe 36 Deluxe Fireplace with Aged Brick Liner, Arch Louvers, Outer Trim in Black, and Cherry Mantel

Tahoe Peninsula Direct-Vent Fireplace with Multi-Sided Refractory Log Set in Nutmeg Peninsula Mantel

Deluxe Series

- **18,000 Btu, 32-inch, 5-piece Log Set**
- **20,000 Btu, 36-inch, 5-piece Log Set**
- **25,000 Btu, 42-inch, 7-piece Log Set**
- **28,000 Btu, 48-inch, 7-piece Log Set**

The Contour Burner on Deluxe Tahoe models – designed specifically to complement the log set – produces a natural dancing flame. The large heat-resistant, tempered glass window provides an unobstructed view of the hand-painted log set.

Deluxe models require just 16 inches of depth, making them ideal for applications where wall-cavity space is tight.

Deluxe models are offered in Millivolt (with standing pilot), Direct Ignition, and Intermittent Pilot similar to modern gas range ignition.

See pages 27-29 for liners, control options, decorative accessories, and required barrier screens.

Direct-Vent Multi-Sided Fireplaces

These Tahoe 36-inch peninsula and see-through fireplace systems are rated at 35,000 Btu and include a 24-inch Slope Glaze Vista Burner installed (and slightly recessed into the floor of the fireplace) ready for the matching Rock Creek Log Set (sold separately).

The unique Slope Glaze Vista Burner features ceramic pellets inside a large burner pan to create a deep field of dancing flames and is topped off with a hand-painted log set. Even when the fireplace is off, the available dimmer-controlled interior lighting creates drama in any room.

Designed to complement our existing fireplace products, the see-through and peninsula fireplaces accept many of the same decorative louver and door accessories as our conventional premium fireplaces, providing better continuity in homes with multiple fireplaces.

The see-through system is viewable from two sides for built-in-wall applications. The peninsula system is viewable from three sides making it ideal for building into buttress walls or installing in a peninsula mantel.

Direct-Vent Clean-Face Deluxe Fireplaces

With their louverless fronts and edge-to-edge viewing area, these Tahoe clean-face fireplaces serve as the ideal focal point for any new construction or remodeling project. Choose Millivolt or IP (Natural or LP) for reliable heating – even in a power outage – or Direct-Ignition (Natural gas with conversion kit), which eliminates the standing pilot light for even greater energy efficiency.

Available in 32-inch (18,000 Btu), 36-inch (20,000 Btu), or 42-inch (25,000 Btu), these all-new fireplace systems feature hand-painted ceramic fiber logs atop our proven Contour burner. As versatile as they are attractive, these Deluxe Fireplaces require just 16 3/8-inches wall depth for installation and allow top or rear venting. Optional accessory liners available in Aged Brick, Stacked Stone, Herringbone, or Black Reflective. A factory-installed blower model is also available.

See pages 27-29 for liners, control options, decorative accessories, and required barrier screens.

Tahoe 32 Clean-Face Deluxe Direct-Vent Fireplace with Black Porcelain Liner, Custom Mantel and Surround

Premium Clean-Face Traditional Fireplace

- **DVCP32BP – 24,000 Btu, 32-inch, 4 x 6 5/8 Top Vent only (View area – 675 sq. in.)**
- **DVCP36BP – 26,000 Btu, 36-inch, 4 x 6 5/8 Top Vent only (View area – 790 sq. in.)**
- **DVCP42BP – 28,500 Btu, 42-inch, 4 x 6 5/8 Top Vent only (View area – 1,000 sq. in.)**

The Premium Clean-Face Tahoe includes a tempered glass view window and a unique burner that delivers a rich flame pattern. The ceramic fiber log set is required (but sold separately). Each log is hand-painted for stunning realism with detailed bark, knots, and charring.

Ceramic Fiber Liner options for Premium models include a traditional Aged Brick with smoky highlights and an old-world Rustic Brick. Or choose the deep black polished porcelain-steel liner that reflects the flames for a luxurious effect.

The available lighting kit draws attention to the intricate details in the log set and brick liner – even when no fire is burning. You can enhance heat distribution with the optional variable-speed blower. Both the light and blower include dimmer controls.

Premium Clean-Face Direct-Vent Fireplace with Rustic Brick Liner

Premium models are available in Millivolt and in Green Earth Preferred Intermittent Pilot. Requires a barrier screen.

Premium Clean-Face Contemporary Fireplace

- **DVCC32BP – 24,000 Btu, 32-inch, 4 x 6 5/8 Top Vent only (View area – 675 sq. in.)**
- **DVCC36BP – 26,000 Btu, 36-inch, 4 x 6 5/8 Top Vent only (View area – 790 sq. in.)**
- **DVCC42BP – 28,500 Btu, 42-inch, 4 x 6 5/8 Top Vent only (View area – 1,000 sq. in.)**

The Premium Clean-Face Tahoe includes a tempered glass view window and a unique burner that delivers a rich flame pattern. The ceramic fiber rock set is required (but sold separately). Each rock piece is hand painted.

The contemporary fireplace includes a deep black polished porcelain-steel liner with added angles to enhance the reflected flames.

Create highlights on the glass media and porcelain liner with the optional lighting kit. And the option variable-speed blower helps circulate warm air throughout your living space. Both the kits include dimmer controls.

Premium models are available in Millivolt and in Green Earth Preferred Intermittent Pilot. Requires a barrier screen.

Premium Clean-Face Direct-Vent Fireplace with Black Porcelain Liner and Decorative Rock Set

Luxury Clean-Face Traditional Fireplace

- **DVCX36FP – 37,000 Btu, 36-inch, 5 x 8 Top Vent only (View area – 796 sq. in.)**
- **DVCX42FP – 40,000 Btu, 42-inch, 5 x 8 Top Vent only (View area – 893 sq. in.)**

With its large ceramic glass window and clean-face design, the Luxury Clean-Face Tahoe looks just like a site-built fireplace, but delivers the convenience and operating efficiency of a modern gas system. The traditional luxury clean-face fireplace is available in 36-inch and 42-inch models.

The Luxury Clean-Face Tahoe includes a ceramic fiber brick floor that helps support the massive log set. Add the matching Rustic Brick liner or change the look of your fireplace with the Old World Stone or Black Porcelain liner. The 10-piece ceramic fiber log set is hand painted for stunning realism with detailed bark, knots, and charring.

Add a decorative front or door set to your new direct-vent luxury fireplace. Choose a front in brushed nickel or oil-rubbed bronze, or operable doors in brushed nickel. Your front or frame attaches in seconds. Each fireplace comes with a fireplace barrier screen to prevent contact with the hot glass. Add the available andirons to convey an old-world look.

The available dimmer-controlled lighting kit draws attention to your fireplace even when no fire is burning. Enhance heat distribution with the optional variable-speed blower.

Luxury models are available in three distinct technologies: premium-level Multi-Function Remote system, Millivolt, or Green Earth Preferred Intermittent Pilot.

30,000 Btu Luxury Innsbrook Direct-Vent Fireplace Insert with Aged Banded Brick Liner and Lafayette Front in Hammered Pewter

Luxury Innsbrook Traditional and Luxury Loft Contemporary Models

We offer our Luxury Direct-Vent Inserts in two sizes and two styles. Our traditional Innsbrook insert features a seven-piece, hand-painted log set exquisitely detailed with bark, wood, and charring – all set atop a unique burner designed to create a stunningly realistic fire.

Both insert styles feature a modern clean-face look – without visible louvers and with the front-mounted valve and control module neatly concealed behind the surround. The large view window (400 sq. in. on the DXL/DXT30 and 584 sq. in. on DXL/DXT35) is protected by a fine mesh barrier screen that allows an unobstructed view of the fire.

An intuitive battery-operated thermostat remote comes standard and lets you light the fire, control the flame height, and vary the speed of the built-in blower. In Smart mode, the thermostat automatically reduces flame height and blower speed as your room reaches the desired setting – eliminating temperature fluctuations.

Luxury Innsbrook and Luxury Loft Direct-Vent Fireplace Inserts

30,000 Btu Luxury Loft Direct-Vent Fireplace Insert with White Porcelain Liner and Accord Front in Matte Black

Luxury Innsbrook and Luxury Loft Decorative Fronts

Your new direct-vent insert will require a surround and decorative front. A fireplace screen comes with the insert to prevent contact with the hot glass.

Innsbrook and Loft Direct-Vent Fireplace Inserts

25,000 Btu Innsbrook Direct-Vent Fireplace Insert with Decorative Frame and Lancaster Decorative Front

Innsbrook Models

A wood-burning fireplace sends more than half of its heat up the flue, creating negative pressure in your home, which draws in outside air through gaps in doors and windows. A wood fire can actually make your home colder.

A Direct-Vent insert system eliminates pressure imbalances in the home that can cause drafts that reduce the effectiveness of heating. The Innsbrook Direct-Vent insert uses readily available 3-inch flexible co-linear vent pipes. At up to 77% efficient, the Innsbrook Direct-Vent Insert makes a great heat source for any room in your home.

Choose a stylish surround, decorative front, or decorative frame and doors. The Innsbrook comes standard with blower and Banded Brick liner.

See page 29 for louver styles.

Empire Direct-Vent Cast Iron Stoves

Empire Medium Direct-Vent Cast Iron Stove in Porcelain Black with Barrier Screen and optional Side Shelves

Empire Direct-Vent Cast Iron Stoves

Bring the warmth and beauty of a Direct-Vent Empire Cast Iron Stove into your home.

Direct-Vent Empire Stoves come standard with Empire's Expanded Slope Glaze Burner system – which adds an extra inch of ember bed. Topped off with the hand-painted ceramic fiber log set, the effect is stunningly realistic and guaranteed to keep you and your guests mesmerized for hours.

Empire Stoves are available in two types of ignition – Millivolt (MV) and Intermittent Pilot (IP). The Millivolt system lights a standing pilot with a pushbutton piezo ignitor. Once the standing pilot is lit, the MV system operates with an on/off switch or optional remote control system. The standing pilot allows your Empire stove to provide heat during power outages.

IP systems eliminate the standing pilot for even greater energy savings. Pressing the on/off switch ignites the pilot, which then ignites the main burner. IP systems can also operate with an optional remote control system. Battery backup allows your Empire stove to provide heat during power outages.

Empire direct-vent models use standard 4 x 6 5/8 vent pipe and require a 45-degree angle pipe off the back to vent vertically or horizontally. The stove generates sufficient heat to warm any room in your home or provide total heat for a small cabin. Your dealer can help you determine your heating requirements.

All Empire Cast Iron Stoves ship assembled in one carton for easier set-up, and include a barrier screen.

Empire Cast Iron Stoves are available in two sizes – compact (19,500 Btu) and medium (26,500 Btu).

Floor pads are available but not required. You can place your Empire Stove directly on carpet or tile.

Empire Gas Stoves include a hand-painted log set and Slope Glaze Burner.

Keystone 36 Deluxe Fireplace shown with Hammered Pewter Mission Louvers in a Profile Mantel

Keystone Series

Keystone B-Vent Fireplaces combine modern technology with traditional venting to create the appearance and performance of a conventional fireplace but with the convenience of gas.

Our B-Vent systems let you prolong the flicker of the flames without overheating your room.

The BVD-34 input is 21,000 Btu; the BVD-36 is 25,000 Btu; and the Premium BVP-42 is 30,000 Btu.

The hand-painted ceramic fiber log set features large logs, arranged to fill the fireplace and complement the flames.

Our deep Premium 42-inch B-Vent fireplace features our Vented Slope Glaze Burner – the industry standard for great looking flames. Ceramic glazed pellets in the burner tumble and swirl the gas to produce a natural flickering fire.

See pages 27-29 for options and accessories.

Deluxe BVD34

*Premium BVP42
(shown with optional Aged Brick Liner)*

Standard Cabinet Mantel in Oak

Standard Mantels

Empire's craftsmen (and women) build each Standard mantel from 3/4-inch fine-furniture grade cabinetry components, including MDF wrapped in select hardwood veneers. Because this natural wood can vary in appearance, we grain-match the components to ensure you get a great looking mantel.

Each mantel is detailed in matching solid wood trim – in oak or poplar. The full 3/4-inch cove moldings and edge trim add structural integrity. Matching decorative trim pieces – in complementary sizes – add beauty and character.

Profile Mantels and Mantelshelves

Available in flush only, our competitively priced Profile Mantels and Mantelshelves feature 1/2-inch cabinet-grade plywood construction with real hardwood moldings. Specify primed (for painting) or unfinished (for staining, painting, or faux finishing).

Standard Corner Mantel

Profile Mantel

Profile Mantelshelf

- Available in Cabinet mantels and Corner Cabinet mantels in 32-inch, 36-inch, and 42-inch
- More compact than Universal mantels
- Built-in base
- Fits White Mountain Hearth fireplaces without modification

- Flush mantels in 48-inch and 52-inch
- Requires non-combustible surround
- Ideal for new construction and remodeling
- Primed or unfinished hardwood
- Reversible pilasters for fluted or smooth style on some models

- Available in 48-inch, 60-inch, and 72-inch
- Ideal for new construction and remodeling
- Primed or unfinished hardwood

Remote Controls and Thermostats

Take charge of your new fireplace with a battery-operated remote control, thermostat remote, electric remote control, wall thermostat, or wall switch.

Remote Control availability varies by fireplace. Some systems include remote.

These Controls are Sold as Accessories for the Burners and Fireplaces Indicated.

Power sources shown are for the controller and for the receiving unit mounted in the fireplace – i.e. "Battery/Battery" means both require batteries to operate. Millivolt systems will provide heat during a power failure. Battery backup is offered on some other systems. It allows the burner to operate without electric power, to provide heat, but will not operate the blower or lighting.

Decorative Fronts and Outer Frames

Decorative accessories let you tailor your firebox or fireplace to your décor. Choose louvers in four patterns – slat, arched, leaf, and mission – finished in matte black, hammered pewter, or brushed stainless steel.

Matching door sets and frames complete the transformation from an attractive fireplace to a stunning focal point.

Our metal three-piece outer frames let you transition from your fireplace to any adjoining surface – wooden mantel, tile, stone, or any non-combustible material. Choose from steel frames – with traditional crisp lines – or our extruded aluminum frames – with a profile that combines gentle concaves with flat surfaces.

Our bottom trim completes the fourth side of the color frame.

Accessory availability varies by fireplace.

Extruded Aluminum Frames

Matte Black
(Shown on Cherry Mantel)

Hammered Pewter
(Shown on Oak Mantel)

Stainless Steel
(Shown on White Mantel)

Fireplace Liners

All brick liners are designed to ensure rich detail and lasting beauty. All liners are made from ceramic fiber unless otherwise noted. Liner availability varies by fireplace.

- *Stacked Stone liners have stones of varying depth and color for a rustic cabin look.*
- *Aged Brick liners have brown bricks with charcoal mortar in running bond courses, plus smoked accents.*
- *Traditional liners have burnt umber bricks with light gray mortar, in running bond courses.*
- *Herringbone liners have burnt umber bricks in a herringbone pattern with light mortar.*
- *Banded Brick liners have dark “creamed-coffee” bricks with charcoal mortar in running bond courses, plus an accent band of diagonal brick.*

Vented Sand Pan Burners and Logs

Our Vented Gas Log Sets provide all the ambiance of a roaring wood fire, with the convenience of instant lighting, instant extinguishing, and variable flame height. The vented gas burners generate a fraction of the air pollution produced by burning wood, and give off no errant coals or floating embers.

Our unique steel reinforced refractory logs stand up to years of use. Each log is cast from hand-carved masters, patterned after real wood pieces for exceptional detail. Our craftsmen paint every log by hand to accentuate the natural color and beauty in the bark, the split wood, and the charred areas. Refractory logs carry a limited lifetime warranty against defects in materials and workmanship. Ceramic logs carry a 5-year warranty.

Vented burners come in double, triple and see-through models – from 60,000 to 90,000 Btu – available in Radco and UL certified models. Non-certified 36-inch and 42-inch triple burners go up to 140,000 Btu.

All of our logs and burners are made in the USA.

(requires see-through log set)*

Vented Slope Glaze Burners and Logs

A vented gas log set makes a great alternative to the hassle of building a log fire in your wood-burning fireplace. Just like a wood fire, a vented gas log set provides plenty of mesmerizing flames and flickering light, but without the heat. And when you are ready for bed, just flick the switch to turn it off – no waiting for the embers to die down.

Our Vented Slope Glaze Burners are rated at up to 75,000 Btu to create taller flames. Vented log sets are considered decorative systems and must be installed in a vented fireplace with the damper open.

Vented Slope Glaze burners are available in 18, 24, and 30 inches in Millivolt and manual models. The Millivolt Vented Burners may be operated with an on/off remote control or wall switch. Vented systems may not operate on a thermostat.

Refractory Ponderosa Log Set (LS-24P) shown with Vented Slope Glaze Burner System (VSR-24) rated at 75,000 Btu

Refractory Sassafras Log Set (LS-24RS) with Vented Slope Glaze Burner System (VSR-24) rated at 75,000 Btu

Refractory Super Sassafras Log Set (LS-24RSS) with Vented Slope Glaze Burner System (VSR-24) rated at 75,000 Btu

Refractory Stacked Aged Oak Log Set (LS-24SRAO) with Vented Slope Glaze Burner System (VSR-24) rated at 75,000 Btu

Ceramic Fiber Birch Log Set (LS-24B2) with Vented Slope Glaze Burner System (VSR-24) rated at 75,000 Btu

Outdoor Fireplaces, Burners, and Fireboxes

A fireplace extends the season for the outdoor living space you worked so hard to create. Our Carol Rose Coastal Collection includes linear and conventional models, fireboxes, traditional log sets and contemporary burners.

All of our outdoor hearth products feature concealed controls and stainless steel for all exterior surfaces to provide lasting beauty. These products are designed for outdoor use only. For installation on a covered deck or porch, at least two sides of the enclosure must remain open at all times.

Contemporary Linear Fireplaces

These large fireplaces are designed to serve as the centerpiece of your outdoor entertaining. Available in see-through and single-sided models, our linear systems feature a burner concealed beneath a bed of clear frost crushed glass and illuminated from below with LED lighting. Simple intuitive controls let you program the lighting to change color, intensity, and tempo to suit your mood. A push of a button lights the fire and a sensor shuts off the gas if the flame is extinguished. A manual control valve offers three flame settings. Choose 48-inch at 55,000 Btu or 60-inch at 65,000 Btu. Options include weather doors and a drain tray to control water runoff.

Conventional Outdoor Fireplaces and Fireboxes

The Carol Rose Coastal Collection started with the traditional fireplace and a refractory log set and grew to include a contemporary fireplace with linear burner. Both are available in 36-inch and 42-inch sizes.

The traditional fireplaces are rated at 50,000 for both the 36-inch and 42-inch sizes. Contemporary fireplaces are rated 36,000 Btu for the 36-inch, and 40,000 Btu for the 42-inch.

Options include weather doors, bi-fold doors, and drain trays.

Our intermittent pilot (IP) systems fit your green lifestyle by eliminating the standing pilot light. Millivolt systems include a standing pilot and will operate with an optional remote or wall switch.

Carol Rose Coastal Collection 48-inch Contemporary Linear Outdoor See-Through Fireplace in a custom surround

Carol Rose Coastal Collection 36-inch Traditional Outdoor Fireplace with optional Folding Glass Doors

Carol Rose Coastal Collection 42-inch Contemporary Outdoor Fireplace with optional Stainless Steel Weather Door

These special outdoor products are named for customer service manager Carol Rose Burtz, who has been with Empire for more than 55 years. As the first time we have named a product for an employee, this represents an appropriate honor recognizing Carol's exceptional history with the company.

Our fireboxes (36 or 42-inch) share the same stainless steel construction but allow you to install any outdoor gas burner or log set.

Traditional Burners and Log Sets

The Carol Rose Coastal Collection includes the Wildwood Refractory Log Set designed specifically for outdoor use with our Harmony Stainless Steel Burner. Both the 24-inch and 30-inch burners are rated at 50,000 Btu – generating plenty of flames to complement the massive concrete log set.

Available in IP or Millivolt technology, these special burners feature internal baffles to induce movement in the flames for an exceptionally natural looking fire.

Contemporary Burners

Our contemporary burner completes your modern outdoor décor. With stainless steel top and linear burner, these systems deliver 36,000 Btu in 24-inch models and 40,000 Btu in 30-inch – with plenty of flames to delight your guests and light up your outdoor event.

Traditional and contemporary burners are designed for installation in an outdoor fireplace or firebox only. Choose LP or Natural Gas.
