

LOFT SERIES DIRECT-VENT FIREPLACES

Loft Medium Direct-Vent
Fireplace with Eclipse Front
in Matte Black

Loft Contemporary Direct-Vent Fireplaces

Available in two sizes, 18,000 and 23,000 BTUs, Loft Series fireplaces let you exhibit your flair for contemporary design.

Designed for in-wall or mantel installation, Loft fireplaces feature state-of-the-art technology for extraordinary performance.

Flickering yellow flames dance atop the linear burner reflecting light off the glass and the porcelain liner to create a nearly infinite flame effect - making your Loft fireplace mesmerizing from any angle.

Fireplace Controls

Millivolt systems operate without electricity to provide heat even in a power outage and operate with an optional on-off remote control or wall switch.

Our Intermittent Pilot (IP) system improves efficiency by eliminating the standing pilot light. IP systems include an on/off switch - add a remote control to light your fireplace from anywhere in the room. In the event of a power outage, your IP system can operate using a battery back up.

Surrounds, Fronts and Accessories

Tailor your Loft fireplace to your décor with one of two surrounds or the Eclipse front.

The elegant matte black surround frames the fireplace and emphasizes the interior. The two-tone surround - with bold stainless steel panels at the top and bottom joined by matte black verticals - accentuates the horizontal lines of the fireplace.

Or choose the contemporary *Eclipse* front to add a slight projection into the room. Available in matte black and hammered pewter.

The front attaches in minutes to the one-piece metal surround and includes a fireplace barrier screen. The screen protects you and your family from inadvertently touching the hot glass - but without detracting from the overall view of the fireplace.

All remote controls carry a 1-year limited warranty.

Empire is committed to continuous product improvement; specifications are subject to change without notice. Dimensions in this brochure are approximate; read and follow the framing dimensions in the owners manual supplied with your Empire product. Flame size, shape, and color will vary from photos.

All direct-vent fireplaces manufactured after January 1, 2015, must be installed with a barrier screen to prevent accidental contact with hot glass. Depending on the fireplace model, the barrier screens are available separately or incorporated into decorative fronts. See owner's manual for details.
