

Tahoe Traditional Clean-Face
LUXURY DIRECT-VENT FIREPLACE

Tahoe Luxury Clean-Face Fireplace with Old World Stone Liner and Alexandra Doors

Tahoe Traditional Clean-Face LUXURY DIRECT-VENT FIREPLACE

With its large ceramic glass window and clean-face design, this luxury direct-vent fireplace creates the illusion of a site-built fireplace, but offers the convenience and operating efficiency of a modern gas system. The traditional luxury clean-face fireplace is available in 36-inch and 42-inch models.

Tahoe luxury fireplaces are heater rated, so they will mesmerize your friends and family as well as warm your room. Zone heating with a gas fireplace saves energy while warming the rooms you use most. The available blower helps circulate warm air more quickly.

Designed for in-wall installation, our luxury clean-face models require just over 22 inches of depth. The venting connects to the top of the fireplace, but can run out the wall or up through the roof. Tile or other noncombustible material may be used to conceal the outer edge of the fireplace to create a true built-in system.

A fireplace barrier screen is included to help protect you and your family from inadvertently touching the hot glass.

These direct-vent fireplaces draw in fresh outside air to support combustion and exhaust combustion by-products to the outdoors. The 5 x 8 vent-within-a-vent isolates the incoming fresh air from the exhaust, yet still requires just a single hole through the wall or roof.

All Tahoe Fireplaces are built at our factory in Belleville, Illinois.

LOGS, LINERS & MORE

The Luxury Clean-Face Tahoe has a ceramic glass view window for exceptional heat transfer and a unique burner that delivers a rich flame pattern. The 9-piece ceramic fiber log set is hand painted for stunning realism with detailed bark, knots, and charring.

The Luxury Fireplace includes a four-piece Ceramic Fiber floor in Rustic Brick. Complete the liner with side and rear panels in Rustic Brick, change the look of your fireplace with the Old World Stone liner, featuring rugged stones; or opt for a more contemporary look with the lustrous black porcelain liner that reflects the flames from multiple angles to add depth.

Optional Lighting Kit

LIGHTING THE FIRE

Tahoe Luxury Clean-Face Fireplaces are offered as Millivolt, Intermittent Pilot, and Multi-Function Remote systems.

Millivolt models feature a standing pilot you light at the beginning of the heating season. While the pilot burns a small amount of gas, this system operates without electricity or batteries. The IP and Multi-Function Remote systems save gas by eliminating the standing pilot. A small spark ignites the pilot, which then ignites the burner.

Both Millivolt and IP systems will work with any of our control accessories – from simple wall switches and thermostats to battery remotes to programmable remotes. Multi-function Remote Systems include a sophisticated thermostat remote control that varies flame height and operates the blower and lighting.

While the IP and Multi-Function Remote Systems require electricity for day-to-day operation they include battery-backup so that, like the Millivolt system, they can provide heat during a power outage. Even though blowers and lights require power, heat from the fireplace will circulate by natural convection.
